

PROGRESS ON FAMILY PLANNING 2020 (FP2020) COMMITMENTS IN TANZANIA

By 2020, the government of Tanzania, in collaboration with its partners and the private sector, will increase the availability of modern contraceptive methods at all levels of its health system:

Ensure availability of at least three modern contraceptive methods at primary-level facilities increases from **94% to 100%**

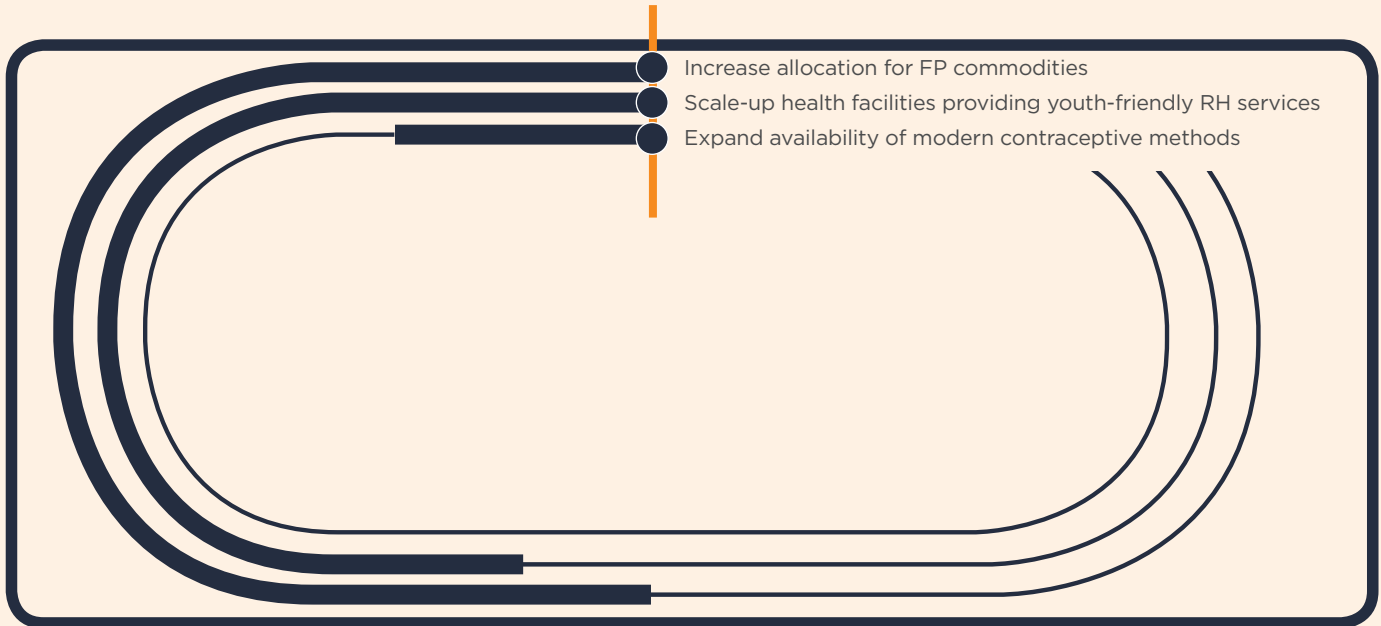

Ensure availability of at least five modern contraceptive methods at secondary- and tertiary-level facilities increases—from **86%** in the former and **88%** in the latter—to **98%**

Ensure number of health facilities providing youth-friendly reproductive health (RH) services increases from **30% to 80%**

Ensure allocation for family planning (FP) services increases from **TZS 14 billion** to **TZS 17 billion** in 2020

IS TANZANIA ON TRACK TO ACHIEVE ITS FP2020 COMMITMENTS?

With less than a year left to report on its FP2020 commitments, Tanzania has allocated TZS 14 billion to procure FP commodities—a significant increase from the TZS 4 billion allocation in fiscal year (FY) 2015/16. Government initiatives have been undertaken to ensure that the number of facilities providing youth-friendly services doubles from 30% to 63%. There are also ongoing efforts to revise the Marriage Act of 1971.

However, there have been challenges surrounding FP budget expenditure, as evidence shows that disbursements are as low as 11% for FY 2018/19. Civil society organizations have been leading advocacy initiatives to influence the government of Tanzania to disburse the FP budget allocated on a timely basis.

In addition to the Ministry of Health, partners in Tanzania contributed to the development of this report:

1 UNITED NATIONS (U.N.) AGENCIES

19 LOCAL NONGOVERNMENTAL ORGANIZATIONS (NGOS)

7 INTERNATIONAL NGOS (INGOS)
